2. Taiwan Power Company “CURE TURBINE, COMPLETE” import project

- Two shipments of “CURE TURBINE, COMPLETE” the **Big & Heavy** power generator equipment originated from Siemens AG requested to ship from Hamburg to Kaohsiung, Taiwan separately in Sep & Nov 2016 .
- Since the power equipment is very heavy and there is a railroad in front of the main gate of Taiwan Power Company, Kaohsiung Div. the equipment was not able to transport by truck (to avoid damaging the railroad.) The Taiwan Power Company Kaohsiung Div. is located along side at Pier No. 24 of Kaohsiung port, but the pier No.24 has been ceased utilization for years. **After the shipment arrived Kaohsiung , we had to arrange lift-off & lift –on this heavy unit by shore crane from inbound vessel to suitable barge and transport it from one pier to the other pier and discharge onto ground from the barge safely . With planning & surveying the transport route and equipment, manpower it may need in advance , Finally, we were able to complete this project successfully.**

P02-Shipment transport route (by barge)
